

SECURITY ELEMENT MANAGEMENT

LEAVE YOUR SECURITY INFRASTRUCTURE IN OUR HANDS

In cases where our clients lack resources or capability to effectively manage their cyber security infrastructure, Layer 3 Communications offers our **Security Element Management** services. This solution leverages our 24/7/365 Security Operations Center as well as our extensive network expertise to provide a comprehensive management solution for our client's security infrastructure. We offer service levels from simple upkeep and maintenance to fully outsourced security management.

Layer 3 Communications' security staff can assist in the day-to-day configuration and maintenance of your information security infrastructure. We assist customers in making sure that they are up-to-date with the latest signature databases and that security devices are running supported and stable software. We also execute any configuration changes on our clients' behalf.

“ I want to commend you guys on the service Layer 3 Communications is providing. The engineers are awesome and highly technical. They are smart enough to make me, as a not so technical IT Director, understand the technical aspect. Your NOC, the people that answer support@layer3com.com, are the best I've seen in my 20+ years in IT. Not sure how you guys communicate internally but it seems that everyone knew everything about my account which leads to quick resolution and better customer service. Makes me feel like I'm the only customer. ”

Calvin Miller, Tennessee Public Defenders

Letting our team of experts manage your security infrastructure not only ensures the safety of your organization, it frees information technology staff to focus on your unique business needs.
