

## SUPERIOR MONITORING & ANALYSIS

As part of Layer 3 Communications' Managed Services suite of tools, **Internet Traffic Reporting** gives unique insights into user traffic data via an easy to use reporting engine.

- High-level view of the top traffic producing users and dive deep into any end user's browsing habits and history
- Reports on website categories, such as news, social media, or shopping
- Integrated with LDAP, for visibility into specific user groups or roles
- Operational insights to identify Internet usage patterns, DDoS attack vectors, and content filtering bypass mechanisms

Contact your Layer 3 Communications representative or send an email to [sales@layer3com.com](mailto:sales@layer3com.com) for more information.
